# IRIS

R. MARSHALL  
2253 North La Salle Gardens  
DETROIT, MICHIGAN

1931

**T**HE pageant of color is at hand. After a good comfortable rest in a mild winter, the iris have dressed themselves in graceful foliage of varying shades of green and are about ready to come trooping through the garden displaying every combination of the rainbow's hues—a regal company achieving a riot of color for a stretch of three months.

And here is a list of fine varieties from which the enthusiast may make his selections—a pallette of many pigments with which the artist may paint the garden picture.

The varieties are listed alphabetically for quick reference.

After each variety is given its official rating made by the American Iris Society, on the scale of 100. First is given the exhibition rating—the score of the variety as a specimen flower. Second is given its garden rating—its value in the landscape. Many of the newer varieties have not yet been judged.

The list offers no variety with a rating under 80.

Then is given the originator of the variety, the following abbreviations being used: Gey., Geylenkek; Gros., Groschner; G. & K., Goos & Koene-mann; Lem., Lemon; Mit., Mitchel; Mor., Morri-son; Sturt., Sturtevant; Verd., Verdier; Vilm., Vilmorin; Wmson., Williamson.

All plants are shipped as soon after July 1 as possible. An endeavor will be made to conform to particular shipping date where the customer specifies definitely. Cultural directions accom-pany all shipments. Plants are sent carriage paid.

Acheron, 85-88 (Sturt. 1924) Red purple.....	\$0.75
Afterglow, 83-82 (Sturt. 1917) Grayish lavender and yellow.....	3 for .50

<b>Pseudacorus Gigantea</b> , rich yellow, grows to 5 feet in moist location.....	1.00
<b>Snow Queen</b> , (Barr 1900) Delicate white blooms. Easy to naturalize.....	.50
<b>Versicolor Blue</b> , native American species. Likes wet ground.....	.35

### POGOCYCLUS IRIS

Interesting hybrids, delicately veined, with ruffled petals. Colors and form unlike the bearded iris common to our gardens. Plant in well drained sunny location. While easy to grow, not many gardens can boast of these varieties.

<b>Lady Lilford</b> , (Foster) Deep violet purple with blackish falls.....	\$2.00
<b>Nazarin</b> , (Foster) Light purple violet.....	1.00
<b>Sir Trevor Lawrence</b> , (Foster 1905) Rosy mauve, gorgeously pencilled.....	2.00
<b>Vulcan</b> , (Foster) Violet purple petals, with black blotch on falls.....	2.00

### COLLECTIONS

My customers have found the following collection plan most satisfactory. I like it because I get a lot of fun out of it. If you do not feel competent to make a wise selection from this list, tell me something of your color preferences and send me the money—\$2.00 or \$200.00, any amount you want to spend—and I'll make up a collection that you'll be proud of. The more confidence the customer displays the more likely my generosity is to get the better of me. That's human nature.

### AMERICAN IRIS SOCIETY

Every iris lover should join. Costs \$3.00 a year. You get a booklet "Irises for the Beginner" and four valuable bulletins each year. Send your application to J. B. Wallace, Jr., Secretary, 129 Church street, New Haven, Conn.

### NEW IRIS BOOK

"Rainbow Fragments" is a new book on iris for the ordinary gardener and the collector, by J. Marion Shull, the eminent iris hybridizer, originator of Morning Splendor, Tropic Seas, Coppersmith and other fine varieties. A thick volume, illustrated with color plates. Chapters on origination of varieties, culture, etc. List of iris recommended for planting. Sent postpaid by Doubleday, Doran & Co., Garden City, N. Y., for \$3.50.
